# Crafty Leaves

We have printed gorgeous leaf patterns on both sides of high quality paper. Use the pre-cut leaves in all kinds of nature-inspired art projects. Gently poke out all of the leaves. Add fun details with gel pen or glitter glue.

Make a leaf collage! Experiment with different colors and sizes. Arrange the leaves on a sheet of paper. Glue the leaves to the paper.

Create cute leaf critters! Look at each leaf and imagine what the shape resembles. Maybe a heart, feather or star. Use long, thin leaves for legs and larger ones for bodies. Add wiggle eyes or draw your own eyes using a gel pen. Layer leaves for a more complex design! Use leaves of different colors and sizes to add depth to your art creation.

Decorate a classroom or window. The warm summer and autumn colors make these leaves perfect seasonal decorations. Build a border around the chalkboard or display leaves in the window.

Make a leaf mobile! Punch holes into each leaf. Use string to hang each leaf from a clothes hanger or branch and tape the string in place. Hang the mobile from the classroom ceiling or in a window.

Paper leaves are perfect for family trees! Write names on each leaf using gel pen. Create a tree from brown construction paper and tape each leaf onto the branches.
