Color Diffusing Hearts

Creating vibrant and unique patterns is fun and easy with these basic heart shapes. Simply sprinkle or spray liquid watercolor or food color on top of your heart shape and watch as the colors mix and mingle creating a one-of-a-kind tie-dye pattern. Personalize these shapes with secret messages using a simple technique called wax resist.

Write out a message with a white crayon and add color. As the watercolor spreads, your message will appear like magic!
