Floppy Foam Brushes

The economical, multi-dimensional, paintbrush that you design!

Foam Paint Brushes are designed to be a versatile and inexpensive addition to your paint area. Easy to clean: run under water and wring out. Create different effects in several ways:

1. Wind a panel into a tube shape and secure with an elastic band; you're ready to explore!

- Swoosh the brush across the page.
- Jab the brush on one spot.
- Twist the handle to form spirals.

2. Make a "traditional" brush! Wrap the foam around a piece of cardboard approximately 3 x 3" (7cm x 7 cm). Secure with elastic band.

3. Make your own shapes!

- Wrap the foam panel around an empty can or cardboard roll and stamp halo prints.
- Wrap around a building block and make block prints.
- Wrap the panel around an old tennis ball and bounce-a-painting!

Try these paint techniques:

Use a stencil. Stab, jab and caress the paint using foam brushes with different handles. Remove the stencil to reveal the picture.

Explore print-making! Blob paint directly onto a plastic paint tray. Lay a sheet of paper directly on top of the wet paint. Pat lightly with your hand and remove gently to reveal a print.

Create awesome collages! Paint a sheet of paper with as many colors and brush configurations as possible. Let the paint dry and cut it into shapes. Glue the shapes onto a second sheet of paper to form a picture or abstract work of art.
