Big! Huge! Fingerpaint Paper Car

Race into a masterpiece with **Big! Huge! Fingerpaint Cars!** Coated fingerpaint paper makes painting easy and smooth. But the designs aren't limited to just painting! Add flash and style to your ride by decorating it with collage materials!

Here's how:

Cover your work area with newspaper and tape the car into place with masking tape. Pour finger paint into small bowls or shallow containers. Keep a bucket of water and some paper towels handy for easy clean up. After the paint has dried use stencils to add more detail; embellish with other collage materials like Roylco's craft papers. Use stickers and decals to turn it into a racecar!

Display your new wheels! Create a race track scene by posting the cars and other decorations along the wall, or tape them to windows for high-speed decorations.
