Rainbow Paper

For more information, ideas and inspiration and to view a video, please visit www.roylco.com/product/R15295.

Bring together science and art with this brilliantly colored and patterned paper!

Rainbows can be a rare occurrence, but they never fail to fascinate kids. Bring rainbows into your classroom with art projects created using this bright paper.

Ideas: Make paper springs! Cut two strips from the paper, approximately 1" (2.5 cm) wide. Glue the two strips together so they make an "L" shape. Fold the bottom strip over the top. Repeat until you run out of paper. Secure with glue or tape. Use as accents in collages or paper crafts!

Make colorful paper doll clothes! Trace around a paper doll of your own or use Roylco's R52004 Card Characters. This paper makes great clothes and accessories.

Practice fine motor skills by cutting squares, triangles, circles or wavy shapes out of this bright paper to use in decoupage or collage projects!

Create colorful paper envelopes! Fold the sheets of paper and use tape or glue to secure the edges. Send notes to parents, grandparents or friends in beautiful rainbow envelopes. Use the back side of a second sheet to write a message to insert in your envelope.
