# Junior Paint Spritzer

To view the complete guide, go to [www.Roylco.com/product/R54466](http://www.Roylco.com/product/R54466).

Create beautiful works of art with these adorable, elephant-headed paint sprayers!

The wax in the crayon resists the paint and will show through.

**Technique:** Fill the sprayer bottle with liquid watercolor paint and squeeze the elephant ear pump to spritz out a fine mist of color onto craft paper. Make yourself a rainbow of paint sprayers by putting different colors in each of the five sprayers.

**Ideas:** Try putting masking tape on paper in crazy patterns, spraying paint on the paper and then removing the masking tape to reveal beautiful artwork.

Choose a base color and spray it on a sheet of paper. Then place small objects like buttons, blocks, or small cups and containers on the paper, on top of the base layer of paint. Spray more layers of paint in different colors over your paper. When you remove the objects, you will have a gorgeous layered painting.

Spray a layer of paint down. Lightly crumple a sheet of news paper and quickly press it down and remove it to create exciting textures in the paint.

Use the elephant spritzer to create a background for your painting, and allow it to dry completely. Then use a different medium (crayons or colored pencils) to create the foreground of your painting. Create a gorgeous paint texture by laying a piece of mesh or a sheet of Roylco's R1504 Paper Mesh over top of a sheet of paper and spray paint over top. Remove the mesh to reveal the texture. Make a rubbing with a crayon. Use the elephant sprayer to add color and pizzazz to the rubbing.
