# Junior Stained Glass Frames

Create simple and beautiful stained glass-like paper crafts! **Junior Stained Glass Frames** come in 12 fun designs, focusing on air, land and water creatures.

## Technique:

Start by choosing one of the frame designs. Punch out the pre-cut windows.

## Simple:

Find a sheet of tissue paper that's a bit bigger than the frame. For added interest, draw a pattern on the tissue paper with marker or gel pen. Apply glue to the back (white side) of your frame and lay the tissue over top. Once dry, trim off the excess tissue.

## Challenging:

Select several colors of tissue or **15257 Stained Glass Paper**. Cut into pieces. Apply glue to the back of the frame. Layer the pieces of paper so they overlap creating different shades. Cover the entire frame with paper. Trim excess.

## Ideas:

Make your own craft paper and create a dramatic frame! Start with a coffee filter. Smooth it out and create a design with water-based marker or liquid watercolor paint. Tip: Try Roylco's **15213 Color Diffusing Paper** instead of the coffee filter. Let the paper dry completely before gluing it onto the back of the frame.

For a more finished look, glue the reverse matching frame onto the back of your frame. There are enough frames to make 24 single frames or 12 double frames. Thread a piece of string and hang in front of a window or make a garland.
