

Castle Collage

Grade Level: KG & Up

Time: 60 mins.

Difficulty: Medium

Clean Up: Soap & Water

Build a medieval castle with shapes, textures and colors. Our Create-A-Castle kit comes complete with castle stencils and building textures rubbing plates which will jumpstart our progress. Even though we'll be using the components from the kit, everyone's castle will be a unique creation. Personalize your collage with different papers, colors, and artistic mediums.

Materials Used:

Roylco *Create-A-Castle* (R58628)

drawing paper (11x17")

pencil

acrylic paints

brushes

markers

crayons

pastels

glue

scissors

Optional Materials:

Roylco *Color Diffusing Paper* (R15213)

liquid watercolors

water

misting bottle

paper towels

Step 1

First, lay out the stencils on a sheet of paper to build up your composition. Once you're satisfied with your castle structure, trace the stencils with a pencil. This will be the base that you'll use to build your castle collage.

Step 2

Each castle will be unique. If you want to use decorative papers, simply retrace your stencil on the paper you want to use and cut out the shape. Then, glue it to your base in the space you traced out for that shape. Use our Color Diffusing Papers and liquid watercolors to add bright and beautiful sections to your collage. Or, draw, paint and color directly onto your collage base inside your stencil tracing.

Step 3

Use the Building Textures Rubbing Plates to create shingles, rock walls, wooden doors, stained glass, and more. You can make rubbings on different kinds of papers, using pencils, markers, crayons, charcoals or pastels. Cover the rubbing plate with acrylic paint and lay a sheet of paper over it to create a relief print. When your rubbings are ready, trace your stencils over them. Cut out the shapes and attach them to your base with glue.
