

# Still Life of Fruit Bowl with Textures

**Grade Level:** KG & Up**Time:** 30–40 mins.**Difficulty:** Easy**Clean Up:** None

For this project, students will create a still life image. One of the oldest and most popular still life compositions is the fruit bowl. Set up a bowl of various fruits, and have the students draw what they see. Using our Crayon Paper, the students will add color to their images in a variety of textures.

## Materials Used:

Roylco **Crayon Paper** (R15419)

Roylco **Junior Goo Spreaders** (R57015)

drawing paper (8.5x11")

pencil

eraser

black marker

Optional Materials:

Roylco **Educational Light Cube** (R59601)

## Step 1

Set up a still life using a bowl of varied fruits.

## Step 2

Using a pencil, draw the fruit bowl as you see it. Don't worry too much about interior details. We're going to be filling those in with colorful textures. Focus on creating a solid, thick outline of your image — like a coloring book page.

## Step 3

Once you're satisfied with your design, go over your pencil drawing with a black marker, filling in the gaps between the objects in your drawing.

## Step 4

Choose a sheet of Crayon Paper and lay it wax-side down over your drawing. Use a different color for each of the fruits. The Crayon Paper works by scratching onto the back with a stylus which transfers your marks onto the surface below. Our Junior Goo Spreaders are great for making marks. You can also use found objects like coins, keys, paper clips or even sea shells — anything that has a firm edge. With our Crayon Paper, you can make super-fine lines with a sharpened pencil point that would be difficult to achieve using a regular crayon. Try placing your drawing and Crayon Paper on our Educational Light Cube for a memorable sensory experience. The light will help to illuminate your drawing, giving you more control over your coloring.
