## Super Learners Classroom Capes

For more information, ideas and inspiration and to view a video, please visit [www.roylco.com/product/R35042](http://www.roylco.com/product/R35042).

Every student can be a superhero with these brightly colored, satin classroom capes! The capes are for more than just imaginative or dramatic play. Simply slide letters, numbers, emblems or artwork inside the 9 x 11½" (23 x 29 cm) clear pocket and make learning active as kids create math equations, words or match symbols and images with partners. We've included reproducible mask and emblem artwork, but feel free to design your own!

Finding it difficult to use the capes when kids can't see their own backs? Make a matching superhero bracelet. Wrap a loop of masking tape, adhesive side out, around each child's wrist. Write out a badge that corresponds to the child's cape emblem and stick it on the masking tape loop for quick and easy reference.

Ideas: Encourage compassion in students! Assign one student to be "Captain Kindness" for the day. Ask the student to create a unique superhero symbol, and challenge them to perform random acts of kindness throughout the day.

Experiment with states of matter! Place different molecules (water, air, earth, etc.) in the cape pockets and ask students to move around the room according to whether their molecule is in a solid, liquid or gaseous state. Solid state molecule students should group together and stay still. Liquid state molecule students should be in small groups and move around the room. Gas molecule students should move rapidly around the room as individuals.

Care Instructions: Hand wash in cool water. Hang to dry. Spot cleaning will leave water marks on fabric. Do NOT iron clear pocket; excessive heat may melt or warp pocket. A cool iron may be used on the dull side of the fabric if desired.
