

Let's make some magic

1. Whip out your washable markers and start coloring the white Color Diffusing butterfly shapes. Color them however you like, but keep in mind that leaving some areas white will allow for some color diffusing magic in the next step.
2. Time for the magic! Fill up your Jr. Spritzer bottle with water and carefully spritz the Color Diffusing shapes that you just colored. Watch as the colors mingle and diffuse throughout the whole shape. Want to see more? Just add more water! Once you're happy with your diffusion, let the Color Diffusing sheets dry.
3. Now place your dried Color Diffusing creations between the black frames and tape them in place.
4. Finally, tie your string to the top of your Flutter Craft Mobile and hang it up for the world to see!

This color diffusing paper is sourced from an FSC-certified mill. Thank you for supporting green.
