# 9" Color Diffusing Circles

Large 9" circles precut from Color Diffusing Paper™ can be painted and decorated to create spectacular crafts in a multitude of colors. Simply drip, spritz or spray liquid watercolors on top and watch as the colors fuse to create a unique pattern every time. Draw out designs with washable markers and mist water on top to create a beautiful tie-dye effect.

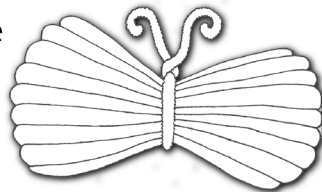

## Make colorful paper flowers!

Using wood cooking skewers as a stem, pinch the center of a 9" Color Diffusing circle and poke the skewer through the point you created. Wrap tape around the stem and the circle to hold your first layer in position. Add three or four more layers and start pinching your petals in place!

## Make adorable, vibrant butterflies!

Accordion fold a 9" Color Diffusing Circle in 1/2" folds from top to bottom. Fold a chenille stem in half and place the folded circle centered in the fold. Twist the chenille stem at the top of the folded circle to create the body and the antenna. Unfold the wings on each side.

## Make festive treat bags!

Place several treats in the center of a 9" Color Diffusing Circle and rest the circle in the palm of your hand. While holding the circle and the treats in your palm, squeeze the sides of the circle upward around the treats and twist the top. Tie a ribbon around the top to secure the treats in this festive little bag.
