Pop Up Pivot Cards

Parents, grandparents and care-givers love these dynamic, handmade cards. The clever design is easy to assemble and fun to decorate. Use for birthdays, Valentine's, seasonal holidays, Mother's and Father's day or anytime someone needs a "pick-me-up." The three-dimensional message card unfolds and pivots as the card opens. Check out our instructional video for simple techniques and project ideas. Visit Roylco.com, search by item number and click on the link. Includes: 24 cards in 12 colors, 11.5 x 16.5 cm.

(Resource Guide)

Create beautiful and memorable greeting cards for every occasion!

There are three pieces to each card: (a) the card, (b) the pivot mechanism, and (c) the pop-up message card. Additionally, you will need crayons or markers, glue stick and a clip like a clothes pin or binder clip (you can reuse the clips many times).

1. Fold the card, (a), in half and decorate the front (the bottom of the card has scored indicator lines below the fold).
2. Fold the pivot mechanism, (b), in half horizontally along the score line. Fold each of the diagonal score line. Fold both wings inside the pivot mechanism.
3. Apply glue within the indicator lines on the inside of the card. Align the pivot mechanism within the indicator lines. Apply glue to the top of the pivot mechanism. Fold the card shut and use the clip to set the glue.
4. Decorate the message card. Fold the message card in a zigzag fashion along the score lines.
5. Unclip the card and open to expose the pivot mechanism. Apply glue to both the left lower and right upper flaps. Unfold the message card and align both ends to the glued areas of the pivot mechanism. Hold in place while glue sets.
6. Fold the card in half carefully. The mechanism will improve with use. Fold and unfold the card several times to make sure the mechanism is working correctly.

Share your card with a friend or family member.
